

BARRIO PLANNERS INCORPORATED - LANDSCAPE ARCHITECTURE

CENTRAL QUAD, EAST LOS ANGELES COLLEGE

Location: Monterey Park, CA

Client: East Los Angeles Community College

Budget: \$49,750.00

Completion Date: 2004

Responsibility: Urban Design and Landscape Architecture

BPI was the lead design firm to prepare conceptual and detail design for the future Central Quad as part of a major reconstruction of East Los Angeles College. BPI developed an overall conceptual plan, for a 1.8-acre site, bordered by the existing Student Activities Building, the Technology Center and the future Humanities Building. BPI also prepared detail design, construction documents and specification for a 0.8-acre site as part of a phased implementation program. The Central Quad design allows for small and large groupings/activities, highlighted pedestrian pathways with color and textured paving patterns, directional lighting, and a balance of trees, turf and hardscape. The design also highlights the main entrances to existing and future structures and creates a unique blend of color and textures.

KAISER PERMANENTE – EAST L.A. CLINIC

Location: Los Angeles, CA

Completion Date: December 2002

Responsibility: Landscape Architecture

BARRIO PLANNERS INCORPORATED - LANDSCAPE ARCHITECTURE

WHITE MEMORIAL MEDICAL CENTER CAMPUS LANDSCAPE & URBAN DESIGN MASTER PLAN

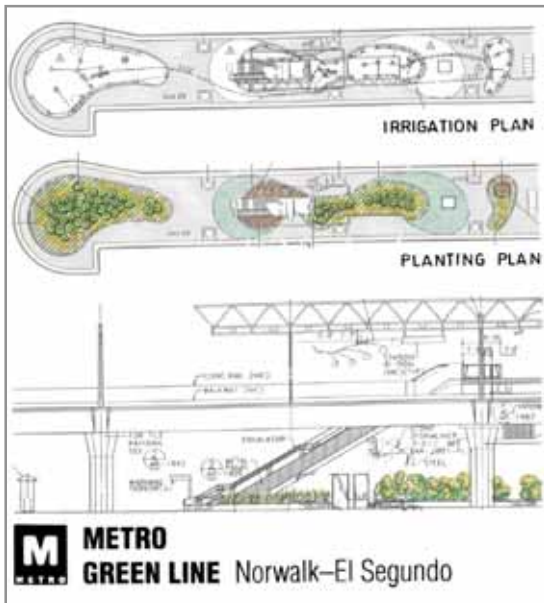

Location: Los Angeles, CA

Client: White Memorial Medical Center

Budget: \$10 million

Completion Date: On going

Responsibility: Architecture, Urban Planning, and Landscape Architecture

METRO GREEN LINE / NORWALK – EL SEGUNDO

Location: Los Angeles, CA

Client: Los Angeles County MTA

Budget: \$3.5 million

Completion Date: 1989

Responsibility: Landscape Architecture

BPI was a sub-consultant to perform final design drawings for the Metro Green Line light rail system from Norwalk to El Segundo. BPI was the Landscape Architect responsible for the three-mile segment from the Century Freeway to Marine Avenue, which included five light rail stations. Specific responsibilities included an inventory and assessment of existing landscape features and landscape opportunities along the light rail right-of-way and adjacent properties, and the preparation of a landscape master plan for the three-mile segment. BPI prepared landscape designs, plans and construction documents for five light rail stations. BPI also coordinated the landscape designs with the architectural designs of the stations, with five artists selected to perform the arts program, and with adjacent and impacted property owners.
